Duration: 60 minutes

Language Essay – 30 marks

English Language Skills – 20 marks

Candidates who qualify the written stages must also pass the Physical Efficiency & Measurement Test (PE&MT) for final selection.

Preface

The recruitment examination for the post of Assistant Sub-Inspector (ASI) in the Chandigarh Police is an important opportunity for candidates aspiring to serve in the law-enforcement system. The examination is designed to assess the intellectual ability, general awareness, ethical understanding, and technical knowledge required for efficient police administration. It evaluates candidates not only on academic competence but also on their reasoning ability, decision-making capacity, and understanding of contemporary issues.

The syllabus of the Chandigarh Police ASI Examination has been carefully structured to cover a wide range of subjects including General Knowledge, Numerical Ability, Computer Knowledge, Reasoning Ability, and Ethics. These subjects collectively test the candidate's analytical skills, logical thinking, and awareness of national and international developments. In addition to the objective test, the descriptive component aims to evaluate language proficiency, clarity of thought, and the ability to present ideas effectively in written form. Understanding the syllabus and exam pattern is essential for systematic preparation. A clear knowledge of the topics, marking scheme, and structure of the examination enables candidates to plan their studies efficiently and focus on important areas. Regular practice, conceptual clarity, and awareness of current affairs are crucial for success in this competitive examination.

This syllabus overview aims to provide candidates with a concise understanding of the subjects and examination pattern of the Chandigarh Police ASI Examination 2026, helping them prepare in a focused and organized manner for achieving success in the recruitment process.

Police Sub inspector (SI) Professional Knowledge

LAW AND LEGAL PROCEDURES FOR POLICE ADMINISTRATION

1. Introduction

The police system in India operates within a structured legal framework designed to ensure the rule of law, protect citizens' rights, maintain public order, and investigate criminal activities. The police are one of the most visible institutions of governance and play a vital role in ensuring safety, justice, and social stability. Effective policing requires not only physical presence and operational capability but also a strong understanding of the legal provisions governing criminal conduct, investigation procedures, and evidence.

Police officers must possess knowledge of several categories of law, including substantive criminal law, criminal procedural law, evidence law, and special legislation relating to women, children, vulnerable communities, and cybercrime. These laws collectively guide how offences are defined, how suspects are investigated, how arrests are made, how evidence is gathered, and how trials are conducted in courts.

India's criminal justice system underwent a major transformation with the introduction of three new laws in 2023 replacing colonial-era legislation. These reforms were introduced to modernize the criminal justice system and adapt it to contemporary challenges such as cybercrime, organized crime, digital evidence, and victim protection.

The three major pillars of the modern Indian criminal justice framework are:

Substantive criminal law – Bharatiya Nyaya Sanhita (BNS), 2023

Criminal procedure law – Bharatiya Nagarik Suraksha Sanhita (BNSS), 2023

Evidence law – Bharatiya Sakshya Adhinyam (BSA), 2023

Substantive criminal law defines offences and punishments. Procedural law establishes the mechanism through which offences are investigated and tried. Evidence law governs how facts are proven in courts.

For police officers, understanding these laws is essential because policing activities—from registering FIRs to arresting suspects, conducting searches, collecting evidence, and filing charge sheets—are governed by these statutes. Failure to follow legal procedures may weaken prosecution cases and lead to miscarriage of justice.

2. Bharatiya Nyaya Sanhita (BNS), 2023

The Bharatiya Nyaya Sanhita, 2023 is the new criminal law replacing the Indian Penal Code (IPC) of 1860. It defines offences, classifies criminal conduct, and prescribes punishments for those offences. The BNS retains many principles from the IPC but introduces reforms reflecting modern realities and societal concerns.

Objectives of BNS

The BNS aims to:

- Modernize India's criminal law system
- Strengthen national security provisions
- Address emerging crimes such as organized crime and terrorism
- Protect women, children, and vulnerable groups
- Simplify legal language and structure

The law provides comprehensive definitions of offences affecting individuals, property, the state, and society.

Offences Against the Human Body

Crimes against the human body are among the most serious offences addressed by the criminal law. These offences involve harm to a person's life, safety, or bodily integrity.
